Total FLASH Used (Bytes):N/A
Total RAM Used (Bytes):N/A Total CALS Used (Bytes):N/A Special Test Requirements: Test Date:10/13/2014 Comments:

NOTE 1: In """"DigColPsInt\_StartRequest"""" function, path """"(Type\_Cnt\_T\_u08 > D\_NONE\_CNT\_U08) = TRUE && (Type\_Cnt\_T\_u08 <= D\_STATUSREG\_CNT\_U08) = FALSE""" cannot be covered because range of """"Type\_Cnt\_T\_u08"""" is '0-5' and value of """"D\_STATUSREG\_CNT\_U08""" is '34'.

NOTE2: In function ""DigColPsInt\_GetData"",""DigColPsInt\_StartRequest"" and ""DigColPsInt\_InterruptNotification"" values for """12c\_Send(Length\_Cnt\_T\_u32)"""", """12c\_SetRecv(Length\_Cnt\_T\_u16)"""", """12c\_SetStatus(Status\_Cnt\_T\_u16)""", """12c\_SetUpMasterReceive(DataLength\_Cnt\_T\_u16)""" and 12c\_SetUpMasterTransmit(DataLength\_Cnt\_T\_u16) are ignored in few vectors as they

are taking garbage value when they are not updated with expected value in particular vector.

NOTE3: The return value of """"DigColPsInt\_GetData""" function is going out of range, anomaly """6156""" is raised for the same.

NOTE4:Range of DigColPsInt\_CurrentStepNo\_Cnt\_M\_enum is considered as 0 to 36, as enum DigColPsInt\_CurrentStepNo\_Cnt\_M\_enum is of type CommStepType which is of 37 elements.

NOTE5:In function ""DigColPsInt\_InterruptNotification"", path ""Case I2C\_RECV\_OVERRUN: True"" cannot be covered because range of ""Flags\_Cnt\_T\_b16"" is 0 to 64 given in MDD.

NOTE5:In function ""DigColPsInt\_InterruptNotification"", output variable ""DigColPsInt\_AttempOccurForCustDatRead\_Cnt\_M\_u08"" is going out

of range.'

Model Type:Excel Macro
Model Version:Nexteer EPS Unit Test Tool 2.7d/EPS Library 1.30
Total FLASH Used (Bytes):N/A
Total RAM Used (Bytes):N/A

Total CALS Used (Bytes):N/A Special Test Requirements: Test Date:10/13/2014 Comments:

NOTE 1: In """"DigColPsInt\_StartRequest"""" function, path """"(Type\_Cnt\_T\_u08 > D\_NONE\_CNT\_U08) = TRUE && (Type\_Cnt\_T\_u08 <= D\_STATUSREG\_CNT\_U08) = FALSE""" cannot be covered because range of """"Type\_Cnt\_T\_u08"""" is '0-5' and value of """"D\_STATUSREG\_CNT\_U08""" is '34'.

NOTE2: In function ""DigColPsInt\_GetData"",""DigColPsInt\_StartRequest"" and ""DigColPsInt\_InterruptNotification"" values for """12c\_Send(Length\_Cnt\_T\_u32)"""", """12c\_SetRecv(Length\_Cnt\_T\_u16)"""", """12c\_SetStatus(Status\_Cnt\_T\_u16)""", """12c\_SetUpMasterReceive(DataLength\_Cnt\_T\_u16)""" and 12c\_SetUpMasterTransmit(DataLength\_Cnt\_T\_u16) are ignored in few vectors as they

are taking garbage value when they are not updated with expected value in particular vector.

NOTE3: The return value of """"DigColPsInt\_GetData""" function is going out of range, anomaly """6156""" is raised for the same.

NOTE4:Range of DigColPsInt\_CurrentStepNo\_Cnt\_M\_enum is considered as 0 to 36, as enum DigColPsInt\_CurrentStepNo\_Cnt\_M\_enum is of type CommStepType which is of 37 elements.

NOTE5:In function ""DigColPsInt\_InterruptNotification"", path ""Case I2C\_RECV\_OVERRUN: True"" cannot be covered because range of ""Flags\_Cnt\_T\_b16"" is 0 to 64 given in MDD.

NOTE6:In function ""DigColPsInt\_InterruptNotification"", output variable ""DigColPsInt\_AttempOccurForCustDatRead\_Cnt\_M\_u08"" is going out

of range.'
